Installation
BENCH

9/2011

Canta Bench

HANDLE WITH CARE! Do not slide parts on concrete or other hard or abrasive surfaces.

Recommended procedure for surface mounting:

Each Bench is shipped assembled with surface mount plates. Although the anchoring procedure and hardware are the responsibility of the installer, we suggest the following:

1. Place the Bench in the desired location.
2. Mark hole locations.
3. Move the Bench aside to allow access for drilling holes.
4. Install the anchors and Bench according to the anchor manufacturer's instructions.

The surface mounting plate is designed for hardware 3/8" in diameter or less.
