Installation
VELO BIKE RACK

9/2011

Velo Bike Rack

HANDLE WITH CARE! Do not slide parts on concrete or other hard or abrasive surfaces.

Recommended procedure for surface mounting:

Each Bike Rack is shipped assembled with surface mount plates. Although the anchoring procedure and hardware are the responsibility of the installer, we suggest the following:

1. Place the Bike Rack in the desired location.
2. Mark hole locations.
3. Move the Bike Rack aside to allow access for drilling holes.
4. Install the anchors and Bike Rack according to the anchor manufacturer's instructions.

The surface mounting plate is designed for hardware 3/8" in diameter or less.
